

App Key Features

- Australian owned and operated.
- Tailored to each council's needs. Not a one size fits all template.
- Owned by council so no change needed if the collection contractor changes.
- Free for residents.
- View information on the app from council's website. Thus we offer an app and a computer based solution.
- Council can edit the app for free at any time through its own content management system.
- Push notification feature enabling messages to be sent to all premises or subsets (individual houses, streets and suburbs). This flexibility enables council to send a message to a particular collection run, an area around a new facility and much more.
- Ability to book services such as bulky waste collections or order bins.
- Display multiple services on the calendar (i.e. standard kerbside collections, bulky waste, second hand Saturday, e-waste, street cleaning and much more).
- Extensive image library with ticks and crosses to reduce contamination.
- Multi lingual functionality.
- Reminder to place bins out and collect them.
- Report a problem feature in which council chooses what residents can report on.
- Advertising space for scheduled and one off promotional events.

Impact Apps is an associated business of Impact Environmental Consulting Pty Ltd, a company which has been involved in waste consulting and management conferences for nearly 20 years.

We primarily work with Local Government and are always looking for ways to improve communication links between councils and their communities.

The App is an innovative product designed in Australia for Australian councils. We are committed to providing both a quality product and outstanding customer service.

A few of our customers

Brisbane City Council

- Brisbane corporate colours used.
- Residents can access the collection calendar from council's website.
- Council can change content in the app and send messages to residents immediately and for free through the content management system.
- Residents given driving directions to the appropriate recycling or disposal facility.

Dedicated to a better Brisbane

Penrith City Council

- Council offers its residents three different collection services. Single dwellings can receive a three bin collection service, in which food waste goes in the organics bin, or a two bin collection service in which food is left in the garbage bin. In addition, some MUD's are offered a twice weekly collection service.
- A sophisticated solution in which the collection calendar, the bin key and information on where to place each waste item varies for every address depending on which collection services that particular premise receives.

BE A WASTE CHAMPION !

PENRITH
CITY COUNCIL

Port Macquarie Hastings Council

- Key tool used to educate residents on a new food waste collection service.
- Collection calendar shows fortnightly garbage and weekly organics OR weekly garbage and fortnightly organics depending on the service residents requested from council.
- Redesigned to be consistent with council's waste servicing branding.
- Extensive images with ticks and crosses used to reduce contamination in food waste and recyclables collection services.
